 $<sup>^{\</sup>dagger}$  From ( $^{16}\mathrm{O},\alpha$ n $\gamma$ ), unless otherwise noted.

<sup>†</sup> Deduced by evaluators from measured  $\gamma\gamma(\theta)(\text{ADO})$  in ( $^{16}\text{O},\alpha$ n $\gamma$ ) and ratios of yields R( $\gamma(\theta)$ ) in ( $^{24}\text{Mg},\alpha$ n $\gamma$ ), unless otherwise noted. # From  $^{35}$ K  $\varepsilon$  decay.

#### **Adopted Levels, Gammas**

#### Level Scheme

Intensities: Relative photon branching from each level
